EXPERIENCE

Katalyst Technologies — Senior Web Developer

March 2018 - PRESENT

- Conceptualized and designed WebApps prototypes using UX/UI frameworks such as Figma, Pen Pots, and Adobe Illustrator.
- Contributed to MobileApp Development, resulting in a 29% increase in e-commerce sales.
- Trained over 50 staff members on inner website functions.
- Built responsive websites using HTML, CSS, JavaScript, WordPress, Magento, and modern front-end technologies such as VueJs from prototypes that I designed.

ANBE Nig— Senior Web Developer/ IT Specialist

July 2018 - present

- Designed and implemented highly complex, dynamic websites using WordPress and Vue.js, incorporating advanced features such as e-commerce functionality and custom security protocols
- Analyzed user behavior and data analytics to optimize website performance and user experience
- Conducted in-depth testing and review of website designs to ensure optimal responsiveness, clarity, and effectiveness across all devices and platforms
- Mentored junior team members in website development best practices and technologies

SprnyxMulti— Junior Web Developer

July 2018 - September 2019

- Assisted a team of developers with identifying and resolving complex technical issues, as well as conducting user sampling to ensure product quality prior to deployment
- Ensured presentation consistency across multiple browser interfaces, including Chrome, Safari, and Firefox
- Contributed to the development and maintenance of high-quality, responsive websites using various technologies and frameworks
